Overview of the EAB Campus Climate Survey

Purpose of the Survey

The EAB Sexual Violence Campus Climate Survey was developed by EAB, a best-practice research firm located in Washington, DC. EAB provides research for student affairs executives on innovative practices for improving student engagement and enhancing the student experience.

The purpose of the climate survey is to understand the scope and nature of sexual violence on college and university campuses.

Survey Design

The EAB Campus Climate Survey is an anonymous online instrument that assesses students' perceptions, behaviors, attitudes, and experiences with regards to sexual violence on campus. The survey consists of a core section and three optional modules (Community Behaviors, Community Attitudes, and Relationship Dynamics).

Survey questions about prevention training received, bystander actions, and experiences with sexual violence, harassment, and intimate partner violence are restricted to students' experiences since the beginning of the fall 2015 semester.

Survey Development

To design the EAB Campus Climate Survey, the research team conducted an exhaustive literature review on sexual violence that included empirical research studies, relevant legislation, existing surveys, and White House task force and Department of Education guidance about current issues of sexual violence across higher education institutions.

Testing the Survey

Individuals at colleges and universities in the U.S. and Canada reviewed and provided feedback on the EAB Campus Climate Survey. The individuals who reviewed the survey at these institutions filled the following roles: assessment expert, counselor, faculty, prevention specialist, sexual assault expert, Title IX Coordinator, and Vice President of Student Affairs. The survey was also cognitively tested with recent college graduates to ensure that the language and content of the survey was relevant to their experience.

Frequently Asked Questions

If the survey response rate is low, how representative are the survey results of our student population?

EAB is not able to determine to what extent the survey respondents reflect the makeup of your student population. Survey results may not be generalizable to the entire student body. You can work with a research expert on your campus to determine how representative the survey results are.

How does my institution's survey response rate compare with other spring 2016 cohort institutions?

The average survey response rate across the 34 participating institutions was 17%. The highest institutional response rate was 52% and the lowest was 1%.

What questions were asked on the survey?

The full survey can be found in your institution's EAB Box folder.

A number of students only partially completed the survey. How do I know how many students answered each question?

Included next to each data chart or table is "n=." "N" is the number of students who responded to the question. The average number of responses is given in charts and tables that combine multiple questions. This is reported as "avg. n=.",

Were any survey questions required?

Survey respondents were required to consent to take the survey in order to proceed to the survey questions. No other survey elements were required.

Why can I break out survey results only by class standing and gender (female and male only)? I want to see sexual violence, harassment, and intimate partner violence broken out by demographic characteristics like race, sexual orientation, and gender identity.

In this high-level analysis, the climate survey team selectively broke out survey results that could best guide sexual violence prevention and response strategy. We did not break out results by demographic characteristics when response counts for a given demographic category were so low (15 or less) that student privacy would be jeopardized. This is most notable in the sexual violence, harassment, and intimate partner violence sections. We recommend you work with a research expert to further explore the data to answer all your institution's questions.
Quick Takes

- The majority of respondents were heterosexual, female, and white.
- Three quarters of respondents consider themselves to be Victoria students.
- Most respondents were in their first four years of school.

<td></td>
</tr>
</tbody>
</table>

Quick Takes

- Most respondents have a positive perception of the campus climate.
- Nearly one quarter of survey respondents had someone make sexist remarks or jokes in their presence.
- More than one third of respondents indicated that a person making a report would experience retaliation.

Percent of respondents who agreed/strongly agreed with the following statements...

- I feel safe at this school. 91%
- I think faculty are genuinely concerned about my welfare. 81%
- I think administrators are genuinely concerned about my welfare. 79%
- I feel close to people at this school. 65%

Percent of respondents who agreed/strongly agreed that if someone were to report an incident of sexual violence...

- The school would take the report seriously. 89%
- The school would take steps to protect the person making the report from retaliation. 83%
- The accused or their friends would retaliate against the person making the report. 37%
- The educational achievement/career of the person making the report would suffer. 29%
Quick Takes

- Nearly all first year respondents received prevention training. The number of respondents receiving training in subsequent years declined.
- Most respondents who received training thought it was useful in increasing their knowledge.
- Nearly one quarter of respondents do not understand what the school would do to address a sexual violence complaint.

Respondents who reported that training was very useful/useful in increasing their knowledge of...

</tbody>
</table>

n= 185

Have you received sexual violence prevention information or training?

- Yes: 72%
- No: 16%
- I do not recall: 12%

Interpreting This Chart

- Students were asked if they received information and training in any of the following areas:
  - Understanding the definition of sexual violence
  - Reporting an incident
  - The school’s procedures for investigation
  - Accessing resources
  - Sexual violence prevention strategies
  - Bystander intervention

Percent of respondents who agreed/strongly agreed with the following...

- I am confident my school would administer the formal procedures to fairly address reports of sexual violence.
- If a friend or I experienced sexual violence, I would know where to go to get help.
- I know what confidential resources (e.g., victim advocacy, counseling) are available to me to report an incident of sexual violence.
- I understand my school’s formal procedures to address complaints of sexual violence.

Avg. n= 255
Quick Takes

- Thirteen respondents (or 5%) experienced at least one incident of sexual misconduct at least one time since the beginning of the school year.
- Respondents most commonly experienced someone fondling, kissing, or rubbing against the private areas of their body or removing some of their clothes.
- Thirteen percent of female respondents experienced unwanted sexual contact prior to college.

Percentage of survey respondents who experienced sexual misconduct and experienced the following one or more times...

- Someone fondled, kissed, or rubbed up against the private areas of my body or removed some of my clothes: 94%
- Someone TRIED to sexually penetrate me: 82%
- Someone sexually penetrated me: 80%
- Someone TRIED to perform oral sex on me or make me give them oral sex: 60%
- Someone performed oral sex on me or made me give them oral sex: 60%

Survey respondents who experienced at least one instance of sexual misconduct

- Number of respondents that experienced at least one incident of sexual misconduct at least one time since the beginning of the school year: 13

Has anyone had or attempted to have unwanted sexual contact with you prior to going to college?

- Yes: 4%
- No: 84%
- Unsure: 12%

Notes

- Respondents were not asked details about the unwanted contact prior to college.
- Ensure that your institution's training and resources address this population of students who come to campus having already experienced sexual violence.
### Quick Takes

- The majority of respondents who experienced unwanted sexual contact were caught off guard by the perpetrator or the perpetrator ignored the respondent's non-verbal cues or looks.
- The unwanted behavior was most commonly perpetrated by an acquaintance, peer, or friend.
- Common locations of incidents of unwanted sexual contact were on and off-campus residences and other off-campus locations.

### Perpetrator Behavior, Relationship, and Location of the Incident

<table>
<thead>
<tr>
<th>Relationship to the Perpetrator</th>
<th>%</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>No. 1 Acquaintance or peer</td>
<td>71%</td>
<td>10</td>
</tr>
<tr>
<td>No. 2 Friend</td>
<td>50%</td>
<td>7</td>
</tr>
<tr>
<td>No. 3 Ex-romantic partner or spouse</td>
<td>14%</td>
<td>2</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Location of the Incident</th>

<td>36%</td>
<td>5</td>
</tr>
<tr>
<td>No. 3 Other off-campus location</td>
<td>14%</td>
<td>2</td>
</tr>
</tbody>
</table>

### Interpreting These Charts

- Respondents who didn’t experience unwanted sexual contact were not asked follow up questions about the incident.
- The same respondent could have selected multiple responses to any question in this section. For example, a respondent could have selected that the perpetrator caught them off guard and threatened to spread rumors.
Reporting an Incident of Unwanted Sexual Contact

### Quick Takes

- Respondents who experienced unwanted sexual contact most commonly told no one about the incident.
- Most respondents received a positive response from the individuals they told.
- Common concerns respondents who experienced unwanted sexual contact had about sharing their experience include feeling ashamed or embarrassed and wanting to forget it happened.
- Most respondents did not report the incident to the school.

### Top 3 people respondents told about an incident of unwanted sexual contact

Did any of the following thoughts and concerns cross your mind when deciding whether to report an incident?

- Felt ashamed or embarrassed, didn’t want anyone to know what happened: 46%
- Wanted to forget it happened: 38%
- Feared others would harass me or react negatively toward me: 38%
- Didn’t think it was serious enough to report: 31%
- Didn’t know I should tell: 31%
- Lack of proof that the incident happened: 31%

### Did you use the school’s formal procedures to report the incident(s)?

- Yes: 14%
- No: 86%

Did you use the school’s formal procedures to report the incident(s)?

- Yes: 14%
- No: 86%

Would you report an incident of sexual misconduct if it happened to you?

- Of respondents said yes. (n=253)
  - 80%

Would you report an incident of sexual misconduct if it happened to your friend?

- Of respondents said yes. (n=253)
  - 85%
Quick Takes

- Respondents view themselves as more likely than their peers to engage in bystander behaviors.
- Ten percent of respondents said they observed a situation that could have led to a sexual assault.
- The most commonly reported bystander behavior was asking the person who appeared to be at risk if they needed help.

Bystander Behavior

10%

Percent of respondents who observed a situation that they believed was, or could have led to, a sexual assault.

Community Behaviors

Percent of respondents that rated themselves and their peers as likely/very likely to engage in the following behaviors...

- Decide not to have sex with someone if they are drunk: 94% Self, 76% Peers
- Express discomfort if someone says that sexual assault victims are to blame for being assaulted: 94% Self, 82% Peers
- Confront a friend who says that they had sex with someone who was passed out or didn't give consent: 91% Self, 79% Peers
- Ask someone who looks very upset at a party if they are ok or need help: 89% Self, 82% Peers
Community Attitudes

Quick Takes

- A greater percentage of male respondents agreed or strongly agreed with most of the statements compared to female respondents.
- More than half of respondents believe that rape and sexual violence can happen unintentionally, especially if alcohol is involved.
- Almost half of respondents believe that a woman who hooks up with a lot of men will eventually get into trouble.
- Over one third of respondents indicated that sexual misconduct was somewhat or definitely a problem.

Notes

- These statements are adapted from the Illinois Rape Myth Acceptance Scale.
- The statements are intentionally heteronormative.

All Students

Percent of respondents who agreed/strongly agreed with the following statements

Rape and sexual violence can happen unintentionally, especially if alcohol is involved.

- 56% agreed
- 8% strongly agreed
- 32% unsure

If a woman hooks up with a lot of men, eventually she is going to get into trouble.

- 45% agreed
- 9% strongly agreed
- 26% unsure

Sexual violence and rape happen because men can get carried away in sexual situations once they’ve started.

- 35% agreed
- 7% strongly agreed
- 26% unsure

A lot of times, women who say they were raped agreed to have sex and then regretted it afterward.

- 23% agreed
- 8% strongly agreed
- 20% unsure

A person who is sexually assaulted or raped while she or he is drunk is at least somewhat responsible for putting themselves in that position.

- 19% agreed
- 7% strongly agreed
- 18% unsure

When someone is raped or sexually assaulted, its often because the way they said no was unclear or there was some miscommunication.

- 18% agreed
- 3% strongly agreed
- 9% unsure

Sexual violence and rape happen because people put themselves in bad situations.

- 18% agreed
- 3% strongly agreed
- 6% unsure

It isn’t necessary to get consent before sexual activity if you are in a relationship with that person.

- 6% agreed
- 7% strongly agreed
- 56% unsure

Rape and sexual violence can happen unintentionally, especially if alcohol is involved.

- 56% agreed
- 8% strongly agreed
- 32% unsure

How much of a problem is sexual misconduct at your school?

- 4% definitely a problem
- 8% somewhat of a problem
- 32% not really a problem
- 56% don’t know

0% 20% 40% 60% 80% 100%
