

**UNIVERSITY OF HOUSTON SYSTEM
ADMINISTRATIVE MEMORANDUM**

SECTION: Information Technology

NUMBER: 07.A.04

AREA: Computing Services

SUBJECT: Digital Millennium Copyright Act

1. PURPOSE

- 1.1. The [Digital Millennium Copyright Act of 1998 \(DMCA\)](#) is a federal statute that limits an online service provider's liability for copyright infringement claims based solely on the online service provider's automated copying, storing and dissemination functions.
- 1.2. The purpose of this document is to establish the University of Houston System's policy to ensure compliance with the DMCA.

2. DEFINITIONS

- 2.1. [Digital Millennium Copyright Act of 1998 \(DMCA\)](#): The DMCA provides regulations pertaining to the implementation of the World Intellectual Property Organization's Copyright Treaty and Performances and Phonograms Treaty. It was signed into law on October 28, 1998. Title II of the DMCA limits liability of online service providers for online copyright infringement claims based on the provider's automated copying, storing and disseminating functions.
- 2.2. Online Service Provider: An online service provider is any entity that transmits, routes, and connects users to online communications or provides online or network services, such as storing digital material, caching or providing location tools (directories, hyperlinks, etc.). Online service providers include local area network and wide area network servers.
- 2.3. Agent to Receive Notice of Claimed Infringement: The individual designated to receive statutory notices from copyright owners about infringements and to send statutory notices to affected subscribers.
- 2.4. Counter Notification: Response under right by alleged infringing party that they believe no infringement has occurred.

3. POLICY

- 3.1. The scope of the DMCA applies to all faculty, staff, and students of the University of Houston System (System).

- 3.2. The statute provides that faculty and graduate students employed to teach or conduct research shall not be considered “the institution” for online service provider purposes. Faculty member or graduate student knowledge or awareness of their infringing activities shall not be attributed to the institution, if the following three important qualifications are met:
 - 3.2.1. The faculty member’s or graduate student’s activities do not involve online access to material that was “required or recommended” within the preceding three years for a course taught by the employee at the institution. The use of e-mail is included in this qualification.
 - 3.2.2. The institution has not, within the preceding three years, received more than two notices of actionable infringement by a faculty member or graduate student.
 - 3.2.3. The institution provides all users of its system or network, informational materials on compliance with U.S. copyright laws.
- 3.3. Every individual is responsible for acting in good faith in reporting copyright infringement activities to the System’s agent, the System Chief Information Security Officer (CISO).
- 3.4. The System is not required to monitor its services for potential infringements. There is no responsibility for the System to seek information about copyright misuse; however, it cannot ignore obvious violations.

4. PROCEDURES

- 4.1. The System CISO is the designated Agent to Receive Notice of Claimed Infringement for the System and each university. Designation of the agent must be provided to the U.S. Copyright Office through the online registration system. All notices of copyright infringement should be immediately referred to the System CISO.
- 4.2. The System CISO will verify that the notice meets the effectiveness requirements of [17 USC § 512 \(c\) \(3\)](#), including:
 - 4.2.1. A written communication that includes a physical or electronic signature.
 - 4.2.2. Identification of the copyrighted work and of the material claimed to be infringing.
 - 4.2.3. Contact information for the complaining party.
 - 4.2.4. A statement of good faith belief that the use is not authorized.

- 4.2.5. A statement that the notification information is accurate and that, under penalty of perjury, the complaining party is authorized to act on behalf of the copyright holder.
- 4.3. Once effective notice is given, the System CISO will act expeditiously to remove (take down) or disable access to the material. Typically, take down will occur within the unit that owns or manages the computer resources involved and notification to affected university parties will occur through the normal chain of command.
- 4.4. Once the alleged copyright infringement is removed or access is disabled, the System CISO will promptly notify the affected user that their materials have been removed or blocked and notify the user of their counter notification rights. This includes forward of notifications received regarding use of university networks for alleged copyright infringement activities.
- 4.5. If a counter notification is received from the affected user, the System CISO will provide a copy of the counter notification to the copyright owner that sent the original notice.
- 4.6. The purported copyright owner shall have seven business days to respond and indicate they have filed a court action seeking to restrain the alleged infringement. If the System CISO does not receive such notice, the material must be unblocked or replaced within 10 to 14 business days of the receipt of the counter notification. Procedurally, the university will unblock or replace affected material as expeditiously as possible.
- 4.7. In the event that a counter notification is not received, infringement will be assumed as a matter of fact. The System CISO or the Associate Vice Chancellor for Information Technology and Chief Information Officer (CIO) may impose limitations on continued use of computing resources by the infringer.
- 4.8. In the event that this is a second infringement by the same person, that individual's account privileges may be revoked, and the Associate Vice Chancellor for Information Technology and CIO, in coordination with the university CIO, may undertake disciplinary review of the case which may also lead to expulsion from the university, termination of employment, and/or legal action against the infringer.
- 4.9. A copy of all correspondence/documentation provided to the alleged infringer and the copyright claimant will be maintained by the office of the System CISO and forwarded to the Office of the General Counsel for review upon request.

5. REVIEW AND RESPONSIBILITY

Responsible Party: Associate Vice Chancellor for Information Technology

Review: Every five years

6. APPROVAL

Approved: _____
/Raymond Bartlett/
Senior Vice Chancellor for Administration and Finance

/Renu Khator/
Chancellor
